Formula Continuation Applications (2nd or 3rd year in grant cycle)

Program Name: _____

With continuations, the original application will auto-populate in the Executive Summary and in the narrative sections. Applicants **do not** enter continuation changes in the original narrative fields, but in the Continuation Changes narrative field.

CNCS expects that programs will maintain a consistent program design for the duration of the three-year project period; however, CNCS recognizes that, on occasion, some programmatic changes are necessary. As a result, continuation applicants may request the changes listed below during the continuation process.

Any continuation applicant not requesting changes that fit within the listed categories should enter "N/A." CNCS expects that most continuation applications will not be requesting changes.

1. **Is the applicant requesting changes in Operating Sites?**

   ☐ Yes ☐ No *If YES, is there enough additional information provided?* _____
